

# Washes clean and *Dries* *without a wringer*

*The first duty* of a washing machine—clean clothes quickly. The Laun-dry-ette Electric Washing Machine washes in about 15 minutes without injuring the fabric.

*The second duty* of a washing machine—rinse the clothes. The Laun-dry-ette rinses thoroughly in 3 minutes.

*The third duty* of a washing machine—"blue" the clothes. The Laun-dry-ette "blues" in a moment, although women who prefer may "blue" during washing.

*The fourth duty* of a washing machine—dry clothes ready for hanging. Nothing beats the Laun-dry-ette. Most washing machines have a separate motor driven wringer which must be fed one piece at a time of dripping-wet-wash. This means repeated dipping into the water to handle every piece. How different with a Laun-dry-ette. Each tubful of clothes is washed in 15 minutes. Then each tubful is "wringer dried" in the machine in less than a minute.

*You never touch the water.* After the Laun-dry-ette has washed, rinsed and blued the clothes, press the pedal which raises the inner tub above the level of the water in the machine. Then the machine whirls the whole tub of clothes better than "wringer dry" in a minute.

*Then you will have washed, rinsed, blued and dried ready for the line, all in the one machine, without putting your hands in water, without breaking a button, without injuring the clothes, and without using a laborious wringer.*

## Highest Approval

The Tribune Institute, Good Housekeeping Institute, and the thousands of women who have used the Laun-dry-ette during the past five years approve it because it takes the labor out of washing, rinsing and wringing.

## Convenient Terms if Desired

The Laun-dry-ette may be purchased for cash, or, if preferred, on the following convenient terms: A first payment of \$50 and following payments of \$15 monthly until the balance is paid. Figure your present cost of having the weekly wash done. You can see how quickly the Laun-dry-ette will more than pay for itself besides saving labor and leaving much more play-time.

We will be pleased to have you call at our showrooms. See for yourself how simply and practically the Laun-dry-ette washes clothes and "dries them without a wringer." If not convenient to visit our showrooms send today for booklet or telephone for our representative to call.

Use a Laun-dry-ette—Then your hands will be always smooth and white for you will never have to dip them into hot water or handle dripping, steamy clothes.

The Laun-dry-ette for stormy days! Clothes "wringer dry" in one minute; dry enough to iron in fifteen minutes—and the Laun-dry-ette itself does the drying!
